

Make time to get it done with Email2Cal from Interchange Group

How often do you get an email and think that you would like to reserve time to "get it done", there and then?

Now you can with Email2Calendar: simply select an email that needs follow up action and create an entry in either your BlackBerry Calendar or BlackBerry Tasks so you don't forget to deal with it.

eMail2Calendar™ from Interchange integrates with your standard BlackBerry™ email client and allows you take any email and create a calendar or task list entry from it

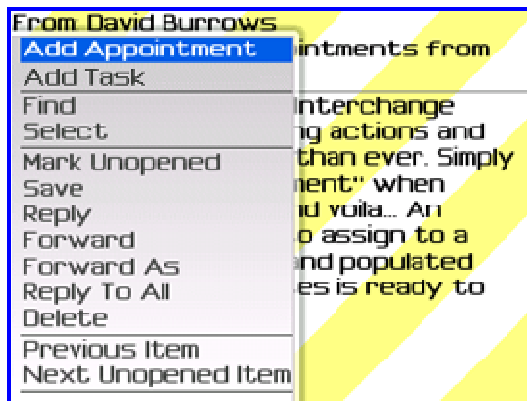

What's more, the text from the body of the email can be added automatically as notes against the calendar appointment and, if you have desktop integration enabled, then your back-office Outlook or GroupWise system will be updated automatically as well.

No more clumsy cut and paste shortcuts, now you can schedule appointments or actions from emails with just a few clicks and they will be there for you when you get back to the office. You can even include other attendees to discuss the actions and have the original email notes that initiated the meeting right to hand.

Go on, make your life easier: download your free, 30-day, trial now at www.interchange-group.com/mobility

Using Interchange eMail2Calendar

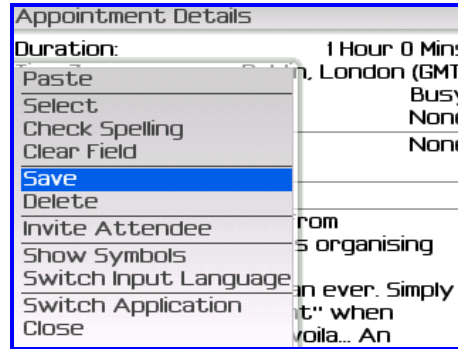

Once installed simply use the normal BlackBerry menu when in the email list or the open email screen and select "Add Appointment" or "Add Task" to add the email to the default calendar / task list.

... and that's it! A standard BlackBerry calendar appointment or task is created. Even HTML emails can be added using the standard BlackBerry text conversion function.

If you wish, you can now edit the default subject and notes text for the appointment and set the date/time etc. in the usual way.

Choose "Save" from the menu to store your entry. To return to your email, just exit the Calendar or Task application.

Installing eMail2Calendar

Simply point your BlackBerry browser at www.interchange-group.com/mobility for a 30 day free trial. After which you can continue using this utility for just a low annual fee. Terms and conditions apply.

About Interchange

Established in 1976 and with over fifteen years of designing and implementing mission-critical mobile data solutions, Interchange Group offers a full range of mobile data solutions. As well as deploying standard BlackBerry applications, Interchange developers and systems integrators can link to or write mobile applications that keep staff in touch with back-office CRM or operational systems. We have a dedicated mobile application development team comprising: pre-sales, support, technical consultancy, implementation, network infrastructure specialists, as well as application development and support staff, all UK-based.

Interchange also provides a full range of hardware (including mobile devices such as printers and scanners), digital pen solutions and technical services including BES installations and consultancy.
