More shows for Interchange

Registration company **Interchange Communications** has won the contracts for several shows in 2003.

Step Exhibitions' Personal Care Europe is new business, while its Biomedical Science event is a repeat contract. It has also re-secured HC 2003 from the British Journal of Healthcare Computing.

The company has also been newly contracted for DMG World Media's The Smart Show and Chemspec, and CAT Publications' Meeting and Incentive Travel 2003.

"We are delighted that customers such as Step Exhibitions and BJHC Ltd continue to use us year after year," says Interchange Communications operations director, Philip Vann. "It is even more pleasing that DMG and CAT Publications are recognising that we are more than just a registration company. Our strength lies in the fact that we are an IT company that can assist in website design and email marketing, through to onsite IT facilities for organisers and exhibitors alike."
