Carpetright turns to Interchange for new server hardware

Telecomworldwire - 13 December 2002
(C)1994-2002 M2 Communications Ltd <http://www.m2.com>

UK carpet retailer Carpetright has chosen information and communications technology company Interchange Group to install a new IT solution.

Interchange has implemented new IBM hardware and carried out consulting services for Carpetright as the company expanded its warehouse facilities. In total, Interchange has provided two servers for Carpetright, one to increase the processing power for the company's existing server system and one to act as a backup. Carpetright will use the new servers to handle stock, sales orders, accounts and other information.

The implementation has been valued at over GBP300,000.
